

write a C/C++ Program to do the following pass the matrices as parameters in all programs.

- 1) Matrix addition/Sub
- 2) Matrix multiplication
- 3) Sum of Principal diagonal / or Principal diagonal.
- 4) Sum of rows & Columns.
- 5) transpose of a given matrix.
- 6) Check if the given matrix is symmetric or not

Solⁿ

```
#include <stdio.h>
```

```
#define MAX_SIZE 100
```

```
